

PROJECT PROFILE

INTRODUCTION

Continuing our long term business relationship with the Methodist Church, we have carried out remedial electrical work, installed a new fire alarm system and upgraded the emergency lighting installation at Acocks Green Methodist Church, Birmingham. An Apollo protocol analogue addressable fire alarm system was installed throughout the church, which necessitated us working around the many varied community groups that use the church and hall. We are pleased to say that we were able to carry out this difficult installation without affecting the busy operation of the premises and as a result of our efforts, the client kindly awarded us the ongoing maintenance contract for the life safety systems.

DATA

Type of Installation:	Ecclesiastical
Size:	6,000sq ft
Number of Floors	Two
Building Contractor:	Central Contracts Ltd
Architect:	N/A
Quantity Surveyors:	Bond Foster Associates Ltd
Consulting Engineers: (Client)	N/A
Consulting Engineers: (Contractor)	N/A

SCOPE OF SUPPLY

Breese and Earle Electrical Services Ltd were principle electrical contractor for a complete turnkey installation of all electrical services incorporating:

- Fire Alarm
- Emergency Lighting
- Electrical Repairs
- Mains
- Maintenance

KEY SUPPLIERS

Electrical Accessories:	M.K
