

INTRODUCTION

Located in Nuneaton, H. Johnson & Sons Jewellers is a highly respected company with a 117 year trading history and Breese and Earle Electrical Services Ltd are proud to have carried out their electrical installation when they completely refurbished their retail outlet. The consulting engineers, Linmat projects were tasked by the clients to design a complete electrical installation to accommodate a shop refurbishment and refit. Part of this brief was to provide LED lighting to the retail part of the premises to reduce running costs and to lower the shops carbon footprint. Partnering with Collingwood Lighting, a spectacular LED lighting system was installed by Breese and Earle Electrical Services, along with all other electrical services during the refit.
